

## **PAGER** Version 12

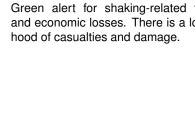

Created: 1 day, 17 hours after earthquake

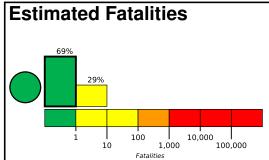

## M 4.0, 13 km SW of Stanley, Idaho

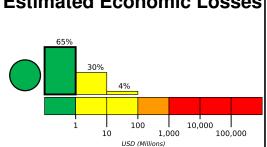

Origin Time: 2020-07-10 08:15:04 UTC (Fri 02:15:04 local) Location: 44.1315° N 115.0662° W Depth: 12.2 km

Green alert for shaking-related fatalities Estimated Economic Losses and economic losses. There is a low likeli-

Overall, the population in this region resides in

structures that are resistant to earthquake shaking, though vulnerable structures exist. The predominant vulnerable building types are unreinforced brick masonry and reinforced masonry construction.
